

Vendaval

Spanish Navy

First of the Viento family, built by Navantia and operating since 2018 for the Ceuta Port Authority. Its main mission is port security, surveillance and environmental control, and capability to support military forces in mine warfare, hydrographic data gathering, ISR and SAR missions with its modular conception for each mission and equipment.

The Vendaval is already being used in Spain for autonomous inshore and harbor surveillance and environmental monitoring missions and is being tested for military utility. It is self-righting, and features an aluminium hull capable of withstanding high temperatures. During Dynamic Messenger Vendaval will be operating with other USVs integrated into combat management system the offshore patrol vessel AUDAZ, which you will see at anchor as we finish this crossing.
